

The Latest in Parametric Design

Our Furniture, Lighting, & Interior Fixtures are code-born. We are able to achieve the geometric, organic shapes that we do because on the most intimate level, our pieces are grown – not merely designed. We use the process of Parametric Design to grow them into the shapes they have, in much the same way a tree's DNA would grow its branches.

Custom Design

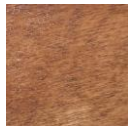

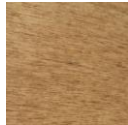

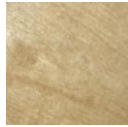

Apart from our collection of signature benches, fixtures, and lighting, Terraform Design specializes in custom design of large-scale commercial pieces - specific to each customer. Through means of strong communication & collaboration, we are devoted to making the everyday landscapes of our clients the best they can be.

The Spore Lamp

Laser Cut Decorative Light Fixture

16" length
14" Height
(custom sizes
upon request)

Nature-Born Methods

The Spore Lamp is a laser cut, code-born work; each leaf programmed into copying and duplicating into its exact intended location. The end result is a shape reminiscent of a pine cone or African Pangolin. This lamp is created from 1/4" Birch Plywood, and is created with Eco Friendly, nearly zero-waste methods.

Zebulun Bench

90"L x 18"W x 18"H

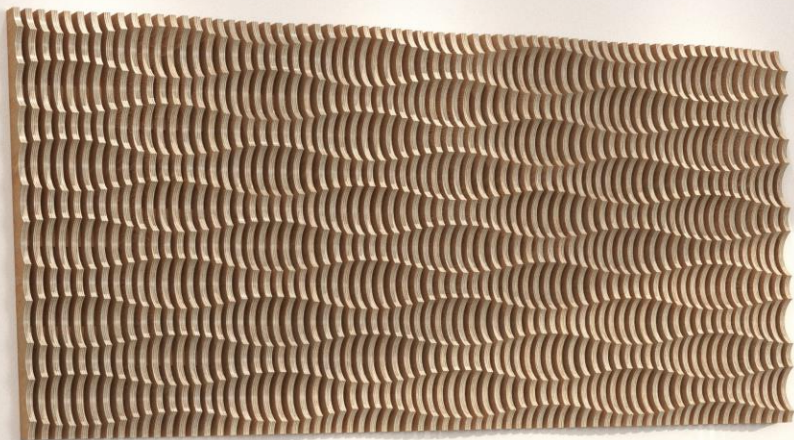

Phoenix Wall Panel

52"L x 4.25"W x 24"H
